

OBJECTIVE

To utilise a combination of technology and experience while adding value in providing consistent quality in the services offered to maintain a reputation as a reliable partner to all stakeholders.

INTRODUCTION:

B.E.S.T. Engineering Services & Technologies Limited has been officially registered as of March 2023. However, by means of our skilled taskforce, we have been offering Electrical Services, Photovoltaic System Installation and General Construction solutions for more than twenty (60) years collectively, while continuously improving on good customer service and delivering excellent workmanship. With all experienced and highly skilled personnels, we are consistently building our clientele through referrals from past customers. In a market saturated by various levels of engineering companies, we have separated ourselves from the rest through our hard work, impressive results, ingenuity, and flexibility by delivering an international standard on a third world platform.

Experts In:

Residential:

B.E.S.T. Eng. has been working industriously to provide residential maintenance and installations island wide, with our teams of qualified professionals, we ensure that every job, no matter the complexity, is done in a professional manner.

- Installation of Solar PV Systems
- Constructions, Renovations and Make readies.
- Installation of electrical power and lighting systems, fire alarm systems.
- Property Management – electrical maintenance and new installations
- Design of electrical systems
- Electrical compliance, testing and certification (licence electricians)
- Fire safety and alarm system.
- HVAC (air conditioning)
- Landscaping & Irrigation (Irrigation systems installation & maintenance, pump solutions, landscape maintenance & construction, fertilization & pest control)
- Water/Wastewater system design services and maintenance (Water distribution modelling, sanitary sewer pump station designs, pressurized distribution systems, stormwater treatment)
- Designed and install outdoor Entertainment areas, Gazebos, Pergolas, swimming pools, fishponds, lawn and mini-Bars/Barbeque.
- Cleaning and Sanitization.

Commercial:

B.E.S.T. Eng. offers to commercial clients programmed maintenance scheduling, routine electrical systems maintenance, and emergency responses for our clients.

- Electrical Design & Installation
- Constructions, Renovations and Make readies.
- Standby generators, uninterrupted power supply (UPS)
- Light and power installation, exit and emergency lighting.
- Energy management systems / power audits
- Preventative Maintenance Management (electrical and mechanical systems)
- Diagnose and troubleshoot faults in pumps, hydraulic & Pneumatic systems.
- Lightning Arrestors and grounding systems.
- Fire Alarm troubleshooting and installation.
- HVAC (air conditioning)
- Pipe installation (EMT, Copper, Black Iron)
- Architectural landscaping services (Design and installation for public and private entities)

Renewable Energy and Energy Efficiency (Solar):

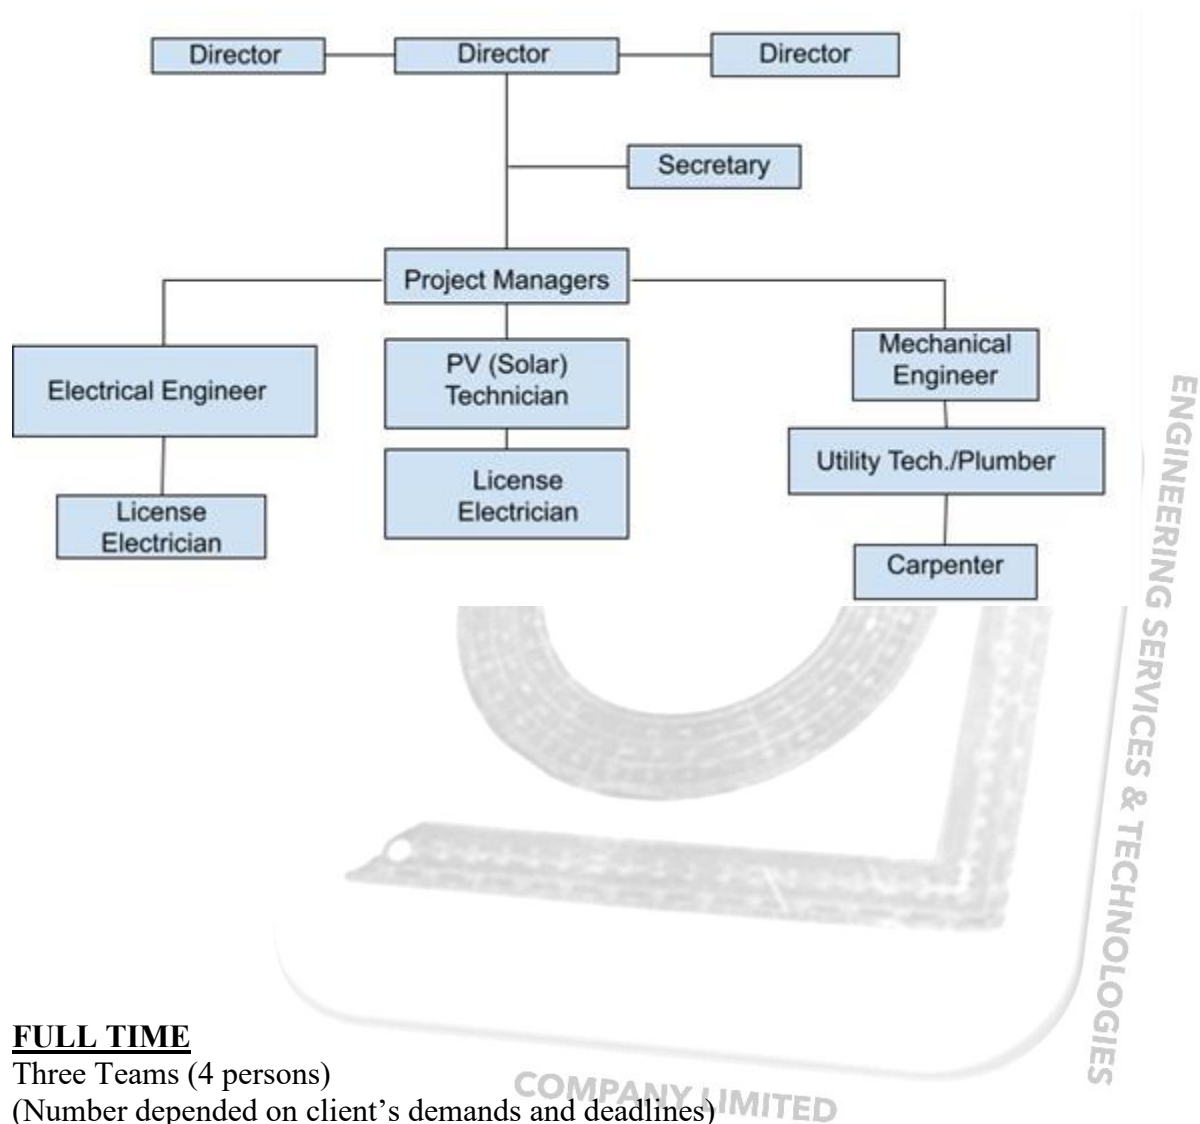

B.E.S.T. Eng Install small to mid-scale solar photovoltaic systems, offering a full array of solar photovoltaic options by use of the latest inverter technology, and large-scale lithium battery storage.

- Engineering Design & Installation
- Operations and Maintenance
- Energy Performance Analysis
- Designing renewable energy systems

General Construction:

- Refurbishment, alteration, and Building extensions.
- Project planning & management
- Steel structure erections and reinforced concrete.
- Architectural drawings.

HUMAN RESOURCES:

FULL TIME

Three Teams (4 persons)
(Number depended on client's demands and deadlines)

24 HR RESPONSE (Emergency Response Team)

One Team (2 persons)

When we define service as working with your schedule, it means responding with the same sense of urgency that prompted your call. We will provide a 24-hour emergency.
